

User Story ID	I want to...	So that I can...
1	Allow users to add article content	expand the database
2	Allow users to edit articles	open source the information so that anyone can correct it if there are disparities
3	Allow users to view articles	people can read the articles
4	Persist the data	keep it within a SQLite database permanently to be referenced for whatever reason
5	Only administrator can delete articles	prevent people from needlessly deleting things
6	Create user accounts to edit information	only allow people who have an account to edit the content
